THE POST-OFFICE BUILDING. When the new building for a post-Waler streels, was commenced, aonie far-seeing people were convinced that the time would come, and at no very distant day, when the building would be found too simil, and would have to cover the entire square to Congress street, but government, when urged to purchase the remainder of the ground gave as one objection, that the surrounding streets were so mirrow that it was not good pelley to invest more in land in that locality. The great tire in November, 1872, furnished an opportunity to widen all streets in that vicinity. and our government became owners all the land bordered by the four streets named above, though the easterly side nnw taces l'osl-office Square instead of Congress street. Milk street and Water street wern windened at a very great expense to the elly, but for some reason, which we have never heard explained, the widening of Devousirie street was not insisted upon, probably because no portion of the new purchase was bounded by that, street. We do not remember exactly how soon after the fire government made the addi-llonal purchase, but it was not a great while from the lime it bought the land before work was commenced upon the extension of the building-prabably seven or eight years ago. That the extension is much needed everyone who

We fluid in the Scriptures many verses which are muzzling, and taken literally contradictory, but experience shows that no accen werds in the Hible prove to be more true than the seven we have queted, though why things should be had been retired with the title and under the pay of his position in tho warry which he left when he accepted the \$18,000 a year, and we presume he is lu possession of a hambonic property besides. He could undoubtedly also by lending his name to some big enterprise, secure a sinecure position worth at least \$10,000 a year, upon which, with strict economy, most fomllies in

this country could be quite comfortable. While we concede that, if it were the custom to pay those who voluntarily retire from the service that game amount They had while actively engaged, no discrimination should be made against one man becouse he happened to posseas property, and we acknowledge Graut's aervices to thu country, we caunot forget that he did retire from the army to be unde President: that he is not lu want or likely ever to be; and only upon the principle we have quetch does there acem to be any reason why hu should have been so highly favored. We lucline to the belief that If he was poor and needy the bill to retire him in till pay would not have pussed so easily rough the Senate, but its action in Ilils case may work good us it precedent when It is proposed to do something for one or more of the country's heroes who do need assistance.

The circus is ever a fascinating subject to young people, and the second part of Mt. LOCAL TOPICS THE WATER SUPPLY.

We are indebted to the Committee on Water Supply for this lown, for a report of the Engineer, M. M. Tidd, Esq., which, with a condensation of a few delails, we present below. Our readers will find it to be of great interest, and it will assist our voters ut the tewn meeting in acting intelligently on this subject, which is one of vital int-

in examining the town with a view to a water supply, the report says there appears in be but one source, and that is Great Pond, which has an area of 220 erea, and seems to furnish good water. As the point filts up every year, and is used for nill purposes, there can be lit the doubt that it will furnish enough for all of your purposes; for if we assume that we can draw 8 feet from the top of the pond, and thus reduce the area to me-half of its original size, or 147 acres, then the mean area between the top and then the mean area between the top and that at 8 feet down would be 217 acres, and 8 feet in dapth with that number of acrea would, if the pond is regarded simply as a reservoir, and had no rain fall for a year, furnish 573,134,500 galons, or 1,542,880 galions per day, or 131 gallons per lay for 25,714 persons. It is vustomary in this country to eatimate 100 gallona per day per head, which includes all purposes for which water is supposed to be used.

All water supply is dependent upon the rainfall, which in this part of the country has for the last thirty years uveraged about 42 luches in death, one-

country has for the last hirry years not-eraged about 42 Inches 'in death, one-half of which is lost by evaporation, &c., having about 21 inches as the supply that may in ordinary years be depended apon. For safely, however, it is best to take the lowest known amount in my one year. That has given about 12 in, depth on the watershed, or 43,560 entice feet per acre of the ched—325,700 galls, becomern ner year.

It would thus appear that the supply is sufficient. The elevation of the surface of the point is at the mean water level 152 feet above the level of the sea has any business to transact at the Postoffice must know; that it will, when

Many were in favor of a compe-tent superintendent of schools. Much

praise was awarded to the primary scholars of the lown. The grammar schools were thought to be superior to those of former years, while there seemed to be a general dissatisfaction with the High Schools. The disenssien brought out the different shades ed interest was munifest, which gives promise of a lively town meeting. At len o'clouk no other question had been reached and the meeting adjourned.

in his mind.

Within that decade of spasmodic respite of peace for enlightened christendom, in the year of Our Lord 1788, Thomas Nash, of true and Godlearing lineage, was ushered into the world. As we recall that epoch of persistent labor of tha peopla of our own land; at a time when the truths of life had been an almost incessant war; when the young Bonaparte in lientenant of ntillery was tacility listening to mutterings of the portending resolution, which, hurling France into anarchy was the forewinner of his own glory, crowning his nation after three-quarters of incentury of transition with mpermanent popular government; and poor crazed George the Third was by the grace of God king of Great Britain and Ireland, we are recalled to this side of the waters.

Here Winshington was just inbout to appear as candidath for first president under this constitution of our just being perfected nation of thirteen States. While fill west of the Mississippi was together with the remainder of this Western Heinlsphere, north and south, under the rigid rule of monarchs of the Old Would, it trip of hours was then a journey of days. Vermont was the Green

Tu him who has passed the riser, the names an Tu him who has passed the riser, the names and oft the presence of our country's patriots were as familiar as household words, mingling in his familiar discourse the bald head and lacial beauty of the elder Adams, the physical unlikeness of the younger; both of whom as well he had gazed on in their coffins. Casually on that Winter's day, referring to my own father—now no more—who as n child had sat at his fert and received from him in the careafter of exhemication. the capacity of schoolmaster—then n mature young man—the first lessons of wisdom, he then turned of my name and race whom he had seen and with whom he had held converse, thereafter relating in-cidents in the career of the two generations who had already yielded up their lifework. Then as we generalized upon the historic past, not only incident and name but the ready garnish of data and ment, flut the writer is well awarn that when an aged

But the writer is well awarn that when an aged, useful citizen has passed away, established precedent would scarce justify an obituary in the sketchy form of the chance, Inherited acquaintance, and the pleasure derived from an afternoon's entertainment, he cordial greeting and kindly reception of this staid personage and his family warrants but a verbal acknowledgment. But relying on the sterling sense of those he has left behind we are justified in the remark that like average while lengthere, his the remark that, like every public benefactor memory is to a degree common property.

Amid the exhausting labors of the field, the steady, untiling man found time, not only to fit himself as a teacher of youth, but to become the Irusted public servant of his townspeople and so fitting, so rounded his career that the treasures of early life were classified in years. NANTASKET.

This happy festival came off at Phenix Hall, on the evening of the 22d of February. At 8.15 supper was served third. I may be at fault, but my reasons for think-ing so are these: In those days we had a very simple and primitive mode of grading schools, that Grace was offered by Rev. F. D. Sargent, after which the Bill of Fure-Baked Beans, Brown Bread, Indian Pud ding and Coffee disapppeared as If by saving all of the bother and perplexity of personal examination; whether as effective for the promotion of education may be questioned, but such was called upon to talk about Washington. giving some of the seenes connected end Mr. Foster's school was eleven years and upwards, which rule placed me in the lower school for that year; afterwards I outgrew the rule, and ry War which he met with in the War was permitted the privilege, and a rare one, I thought it, of attending his instructions.

Nothing Short of Unmistakable

Denellts Conferred upon tens of thousands of sufferers could originate and maintain the reputation which Ayer's Sarsa-PMILLA enjoys. It is a compound of the best vegetable alteratives, with the lodides of Potassium and Iron,—nil powerful, blood-making, blood-cleansing powerful, blood-naking, blood-cleansing and life-sustaining—and is the most effectual of all remedies for scrofulons, mercurial, or blood disoriers. Uniformly successful and certain, it produces rapid and complete cures of Scrofule, Sores, Balls, Humors, Pimples, Erupitions, Skin Diseases and all disorders erising from impurity of the blood. By its invigorating effects it always relieves and often cures Liver Complaints, Female Weaknesses and Irregularities, and is a potent renewer of wening vitality. For purifying the blood it has no equal. It tones up the system, restores and preserves the health, and imparts vigor and energy. For forty years it has been in extensive use, and is to-day the most available mediciae for the suffering slek.

When on my day of life the night is falling, And, in the winds from nasunned space My fact to pathe noknown.

> Then who hast made my home of life so ples leave not its tenent when Its walls desay: Be thou my strength and stay!

Be near me when all else is from me diffilm And kindly faces to my own aplifting
The love which snewers mine.

I have but theu, O Father! Let thy spirit Be with me then to comfort and uphold; No gats of pearl, no branch of palm, I merit,

Suffice it if-my good and ill unreckonni, And both forgiven through thy sbound grace—
find inysolf by hands familiar beckened

omn kumble door among thy many mansions Soms sheltnring shade where sin and striv and flows forever through heaven's green pansions
Thu river of thy peacu.

Ayki's Hark Vision will restore faded or gray, light or red hair to o rich brown or deep black, as may be desired. It softens and cleanses the scolp, giving it a healthy action. It removes and cures dandruff and humors. By its use falling hair is checked, and a new growth will be produced in all cases where the follicles are not deciroyed or the glands decayed. Its effects are beonifully shown on brashy, weak, or sickly hair, on which a few applications will produce the gloss and freshiness of youth. Harmless and sure in its results, it is lucamparable as a dressing, and is especially valued for the soft justre and richness of Jone it lusparts. for the soft lustre and richness of ione it inparts.

HORTE WEYMOUTE

In N. Weymouth, March 16, John Vessler, Jr., aged 13 years 2 months. Funeral ter-vices will be held in the Catholic chapel this afternoon. By his death the parents non, bright, sctive, inicilizent, and leved by all. The family have the sympathy of he whale community in their affliction. round freed.
Trenday morning, about 9 o'clock, Mr.

found a man apparently slead, hanging partly over the side. Assistance was called ind the man was taken into a shed in tho ahipyard, where the body remained until Dr. Tower, Medical Examiner, arrived.— His verifict was that the man died from exhaustion in rowing the boat. The man belonged to the Sallers Home, in Quincy, and was about 30 years old, of good habits and much respected. He was subject to bad fainting spells, and it is supposed that he had a turn. He worked at bashet making, and hail sent to Boston the Gay before by Moulton's capress for stock, rowing scross tha river to get it. Ho was a Sweda, and we learn has no relatives in this country.

New Vessel.

E. Porter Keen is having heavy timber anled every day to his yard from various places, and has the keel laid for a three masted schooner. Ills vessels are rated first class.

The Ryerson Company, of Boston, gave one of their popular concerts in the Pilgrim vestry Tuesday evening, under the ampicea of the Ladica Social Circle, the vestry being crowded. A brilliant programme was presented, of singing, harmonica playing, violin solo hy Miss Etta Sherman, decismation and character sketches by I'rof. Rycr. ion, and plano music by Miss Viola J. l'almer. The singling was excellent, and Prof. Ryerson, who is a comical genius, kept the audience in a tickle during his tketches. This company display fine tal-ent and ability, and are highly appreciated wharever they give entertalnmenta.

House one day last week, while the propritor was away, outrance being maile by back window, and some \$5 worth of cigara obacco, &c., were stolen, the house also being ganorally runmaged.

The Ladles Social Circle connected with Rev. Mr. Tyler's society held thair semimonthly meeting Wednesday afternoon and evening, with a full bouse. Baked brana were a specialty, as usual. Bick List.

BRAINTREE.

On Friday evening last there was a prirate party and sucial dance at the Town tion by a few of the young people of the town. These same parties have had two r three other partica during the season out the weather has been unfavorable a that although they were very pleasant they illd not prove so successful as was desired ward, and the last one was more satisfactory, in consequence of which we under stand a masquerade party is in process of

their Summer residence on Saturday of

The result of the cancus and consequent-y of town meeting seems in one parifcular at least to have been an oversight and au mintentional one on the part of a large najority of the citizens of the towo. We have reference to the neglect of Esq., his own successor upon the school committee. Mr. White has for a long time been a member of the board and one of its most faithful and efficient members, taking great interest in the welfare of the schools, and one who had the hest interests of the town at heari. Many feel that his denotes a purpose on the part of some per-sons whose interests or desires were in that direction, to get rid of him and his infinence and that the nominations were spring upon the caucus at a late hour when the people were tired and in a hurry to get home, and without giving the mat-

same being dropped so unceremonionaly er careful consideration adopted the non-nations recommended. No word of fault s to be found with the persons elected to fill the places, only with the method adopted and means used.

This only goes to show that the incthed dopted in our caucuses of sending out a committee to nominate for the meeting (for that is just what it amounts to,) is to be deprecated, for it enables these matters to be manipulated by a few men who are always put upon such committees, largely lu their own interests or that of their friends; and we trust that the voters of this town will soon be awake to this growing evil and be prepared to put their feet firmly down upon this system of political wire-pulling, which has so much to do with our municipal affairs, speaking in tones which shall not be misunderstood. Until this is done the offices will be filled

only by men, be they young or old, who belong to a certain clique or will pursue a course to further their interests. Braintres, March 10, 1882. Jamet Willis, wife and daughter left for

Texas last week, intending to take up Organised.

Many times has the law been applied to remedy the difficulty but accomingly without avail, and even when the proprietor was followed so closely that he promised to close his place and go into other business if the community would "let up" on him, ha broke his promise and continued right on till within a few days, when by the mutations of change the property pissed into other hands, John Kelley being the lucky man who has thus been successful in routing the enemy horse, foot and dragoon by purchasing and taking possession of the property at the janction of Commercial atreet with Quincy avenue, so long known as Miss Feeney's corner. We understand that had so the up the Louse in shelter himself and family until such time as he is prepared to build. MARSHFIELD.

The third meeting of the Marshfield Farmers' Club was held in Agricultural Hall, Thursday of last week, and the same as previous meetings was marked by a large attendance. The meeting was called to order by the president of the Marshifield Agricultural society, Geo. M. Baker, Esq., who also presided. After a few introductory remarks by the president, Lysander Richards, of East Marshfield, delivered a very able lec ture on "The Formatica of Earth," This was followed by an essay on "How an Farniers make their homes more attracilve," by Rev. Ebenezer Aiden. Dr. Horace P. Wakefield, of Leleester made few remarks on the farmer's home, lu which he strongly recommended the importance of a good sanitary system, both in the household and in the outbuildings. Calch Bates, Esq., of Kingston, speaking on the best varieties of fruits to cuitivate, said that in his judgnent the strawberry and the grape were ndispensalds to every farmer. At this solnt the meeting adourned until after-

Wide Awake for April, 1868.

The April Wide Awake opens seasonably with a charming Easter Frontispiece by Mrs. Jesse Curtis Shepherd, illustrating "Illow Jacky, West to Cheuch," Following, comes "filtite Peaching," a Japanese Folk-Lore story with very aprirted illustrations. Then there is a jolly stery for the boys, entitled "Too Fond of Maple Sugar," Toward the close of the number is another out-of-door story, "A Quaker Boy's First Fot Itani." Excellent stories, too, ere "How Naomi Flooded the Bog," "Frankapog & Boss," and "A Naniscket Story." The serial, "From the Iludson to the Neva," takes us into a region likely to become very interesting in the near future; and "Thief Club and Ours," the serial by a boy, sustains its luterest and action admirably. Papers of great value are also found in this namber. D. Lothrop & Co., Boston.

We know the building. We know that if the same fire had reduced the old Did South Church lo ruins, regrets for lio destrue tion would have been short lived, and we should have been apared the long attuggie for its preservation. Therefore, while we will yield to none in a determination to oppose any eneroactiment upon the Common, we can see that the public convenience may and probably will necessitate the widening of Tremont street between the points we have named, and as that widening can be made most easily and inexpensively by taking a small sile of the mall which will not be missed nor affect.

Band Fair. There is a saying that anticipation is more than realization, but in the case of the fair in aid of the North Schuate Brass Band, which opened Tuesday eve ning, it was just the reverse. Jenkius Hall was elegantly, decorated and prescuted a fine appearance. The tables, too, which were in charge of several young ladles, deserve special mention on account of the artistic arrangement of the articles. The painting of the "Old Sloop," by George S. Dalby, was the most conspicuous on account of its artistic merit. The miniature yachts the Singer newing machine, and the parlor organ which are to be prizes drawn are on exhibition. In the way of entertainment, the distinguishing feature of the evening was the consolidation of the North Seituate and South Schuate bands, which comprised forty pieces. The music was excellent and the programme varied and luteresting. There was a very large attendance and it is safe to predict that the fair now in progress held in Jenkins' Hall. The large corporations like the Lowell, Bigelaw and Roxbury Caspet Companies employ the best designing talent in the country, and this spring, more than at any previous time, thela productions exhibit a high grades of artistic merit.

The huge figures and characters, yellaws, redy, greens, and other old-fashioned colors, have entirely desappeared, and the modest, small figured caspets, pethaps copied from some old Eastern rings, are seen in their stead.

His wife's fears had been vain ones. Wine was placed on the table at every meal, and John drank his glass regularly—but no more. He was proud of his temperance. His head was always slear. "Only fools abstaln," he mid one time, is answer to the pleading of his wife. "But for your children's mke, do not have wine on the lable," persisted Mrs. Remeasworth.
